to Recipients

Good day,

I am Mr.Rami Makhlouf from Syria; I am interested in buying properties and other investments in your country through your assistance if you can help me. I would like to learn more about your country's culture and other interesting lucrative businesses in your country.

I would like more information about these projects so that I can learn more about the investment project in your country and clarify your plan.

I was a businessman in Aleppo before the civil war. My business has been destroyed by the war. Our economy has collapsed since 2012. There is no meaningful economic activity going on in Syria and there will be none for the foreseeable future even if the war stops today as it will take more than four decades to rebuild our infrastructure and our economy.

I want my daughter to emigrate to your country but not as a refugee rather as an investor, as I still have a substantial part of my cash holdings intact. For me, I have been seriously sick for eight months now. I have Chronic Lymphoid Leukaemia and according to my doctors I have not much time to live. This is why I found it wise to contact a business person in your country to help me since this country won't be safe for my 11 years old daughter.

I wish for a prompt response from you regarding my letter.
